Information Night

You are cordially invited to this informational meeting regarding ZeroTB America which is an international mission and humanitarian organization committed to eradicating the tuberculosis epidemic from the whole world. Tuberculosis has been one of the worst diseases for the poorest people and it has recently come back with new forces. Although we are dedicated to helping all nations of the globe, we are currently focusing on helping TB patients in North Korea, one of the most closed and poorest countries in the world. We have more than 1.2 million TB patients and around 300-400 thousand TB children in North Korea. It is absolutely urgent for these children to get proper medication and we want to do good works for them. Please come and get informed about how to help one of the least of these people.

Program
