Using ATLAReligion with ATLASerials

Table of Contents

Searching ATLAReligion with ATLASerials
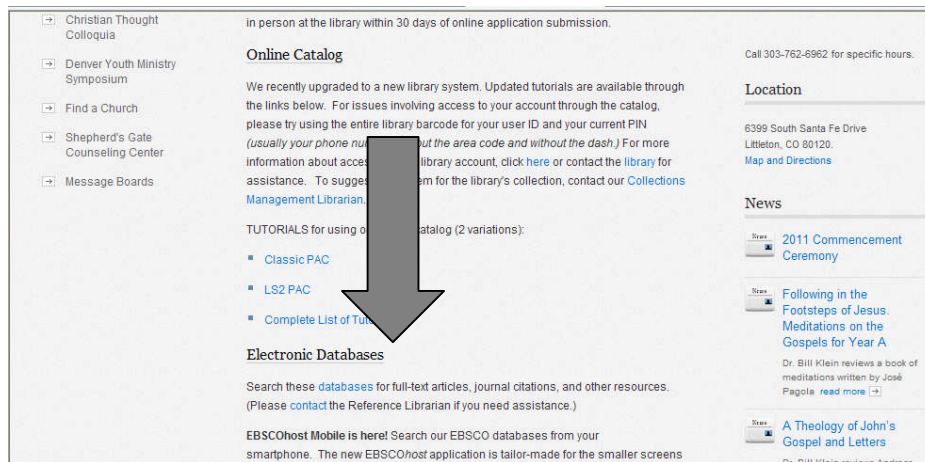

ATLAReligion with ATLASerials, or ATLA, is a comprehensive database that spans over 50 years. It is used to find and access journal articles, book reviews, and essays.

Searching using ATLA

To Access ATLA:

1. Clicking on *Library* on the Seminary's homepage and then clicking on the *Electronic Databases* link:

2. Click on the **ATLAReligion with ATLASerials Link**

3. If necessary, enter the Seminary's EBSCO user id and password to access the database. (If you do not have the user id and password, contact the library for this information.) When accessing the databases from the library, you will not normally be required to enter user id or password.

4. The following search screen appears:
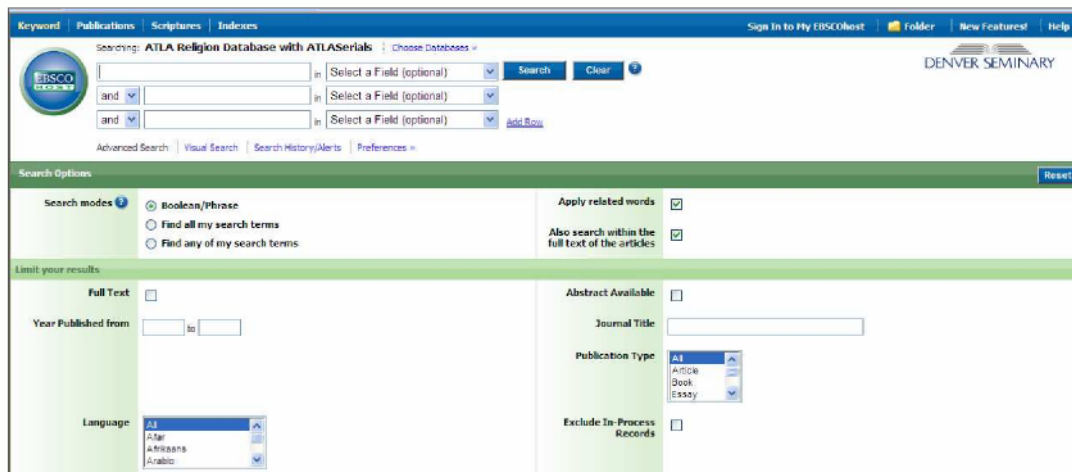

This screen allows the following search options to be used:

    a. Single or multiple criteria to be used to search the database

    b. The search results can be limited to reduce the number of items found in the search results

To Conduct an ATLA Search

ATLA can be used to search for

    a. Individual criteria, such as searching for a specific author, subject, title or scripture reference

    b. Multiple criteria, such as searching for an author and title

This example will focus on a scripture reference

1. Choose Scripture from the links across the top of the page.
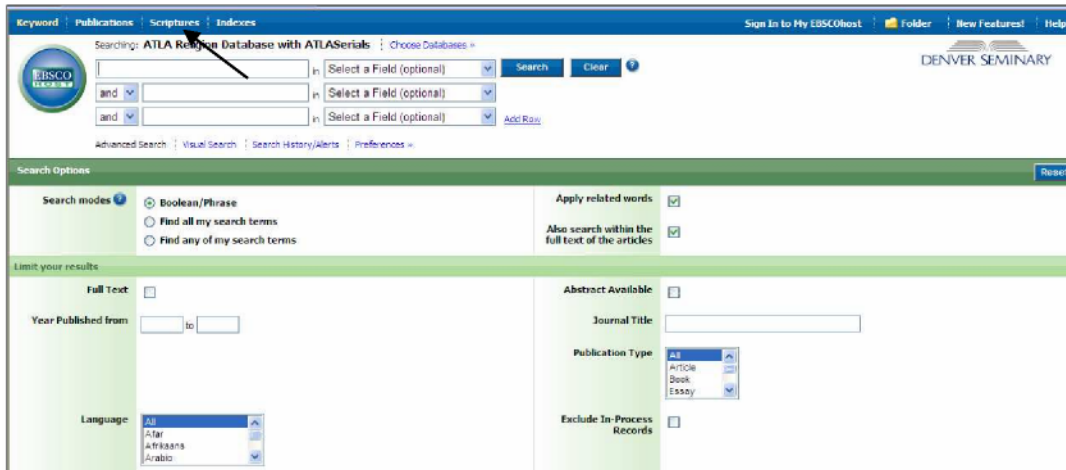

2.   The search results will be displayed as below
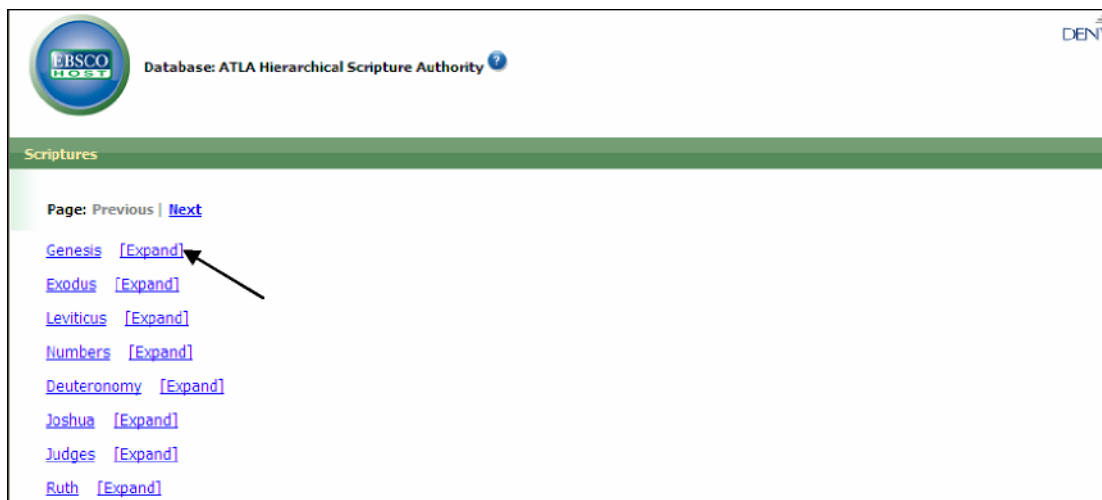

3. Choose the book of the Bible you will search and click on expand.
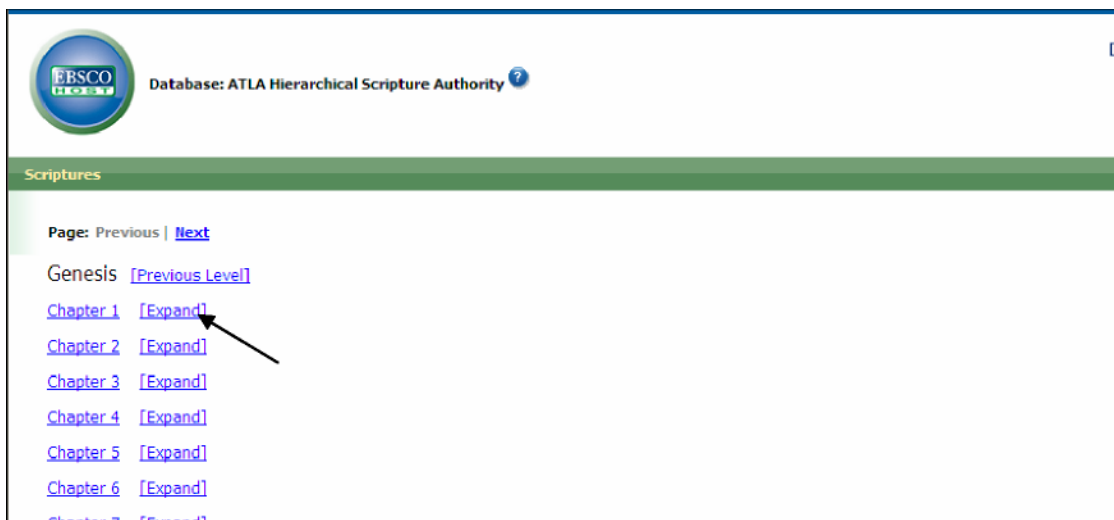

4. Choose the chapter of the book you will search and click on expand. Then click on the verse.
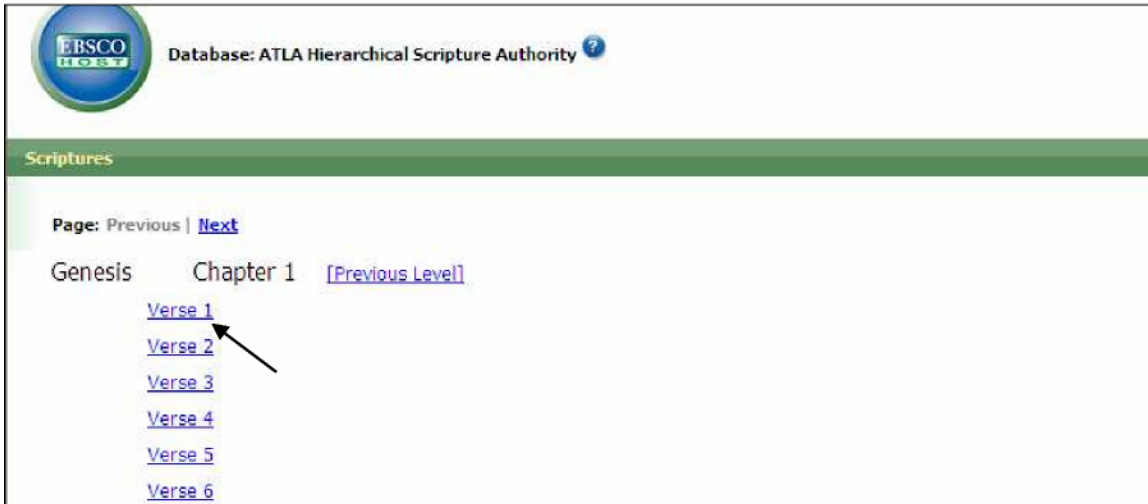

5. The search results will then display:
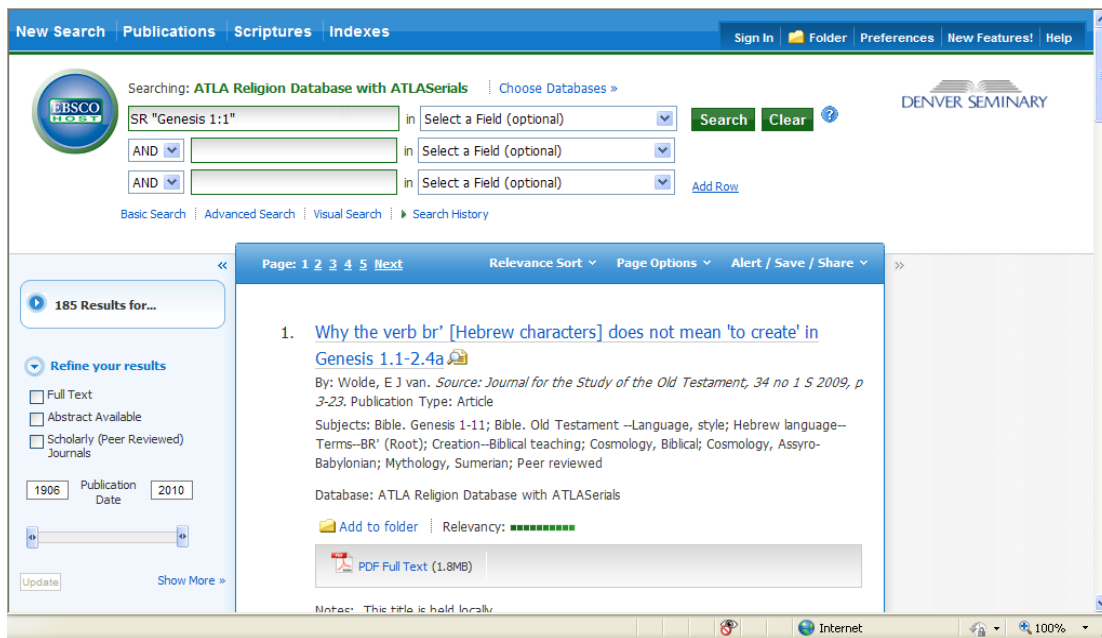

6. Each entry that provides a full text PDF document will display the following information:

Publication Title

1. Why the verb br' [Hebrew characters] does not mean 'to create' in Genesis 1.1-2.4a

   Author

   By: Wolde, E J van. *Source: Journal for the Study of the Old Testament, 34 no 1 S 2009, p 3-23.* Publication Type: Article

   Publication Source

   Subjects: Bible. Genesis 1-11; Bible. Old Testament --Language, style; Hebrew Terms--BR' (Root); Creation--Biblical teaching; Cosmology, Biblical; Cosmology, Assyro-Babylonian; Mythology, Sumerian; Peer reviewed

## A Word About Using Citations

A new feature of ATLAReligion with ATLASerials, and with other databases within the new EBSCO platform, is the ability to print, email, and save citation references. ATLA has the capability to create a citation reference for the publication in a number of prescribed formats, such as APA or Turabian. To view the citation before printing or - mailing it:

1. Click on the publication title in the search result list:
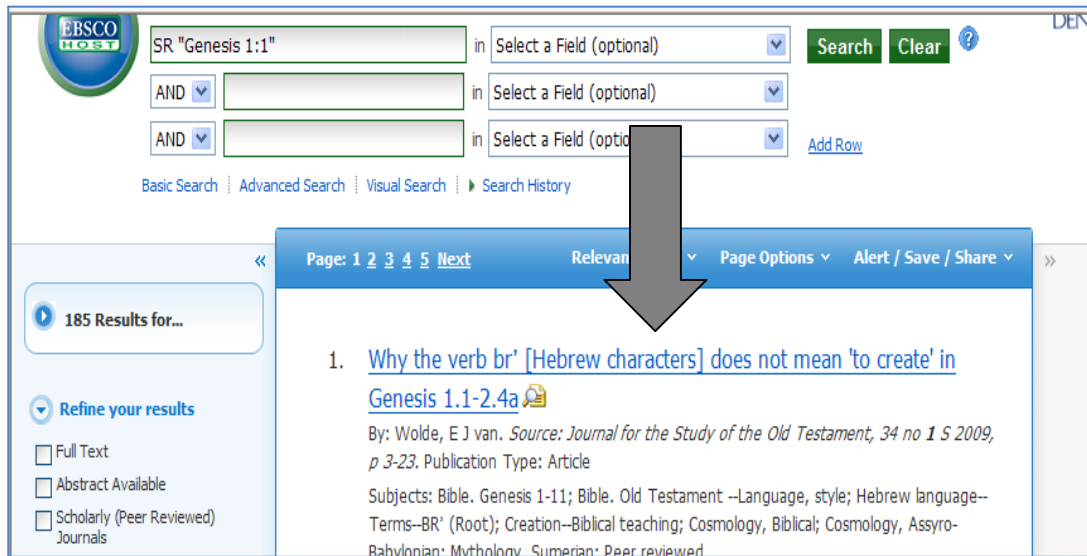

2. The following screen appears:

The screen momentarily will go gray and the Citation Format window will appear. It will show the citation for the publication in several forms. This can be used to help you decide which format you want to print or e-mail the citation.
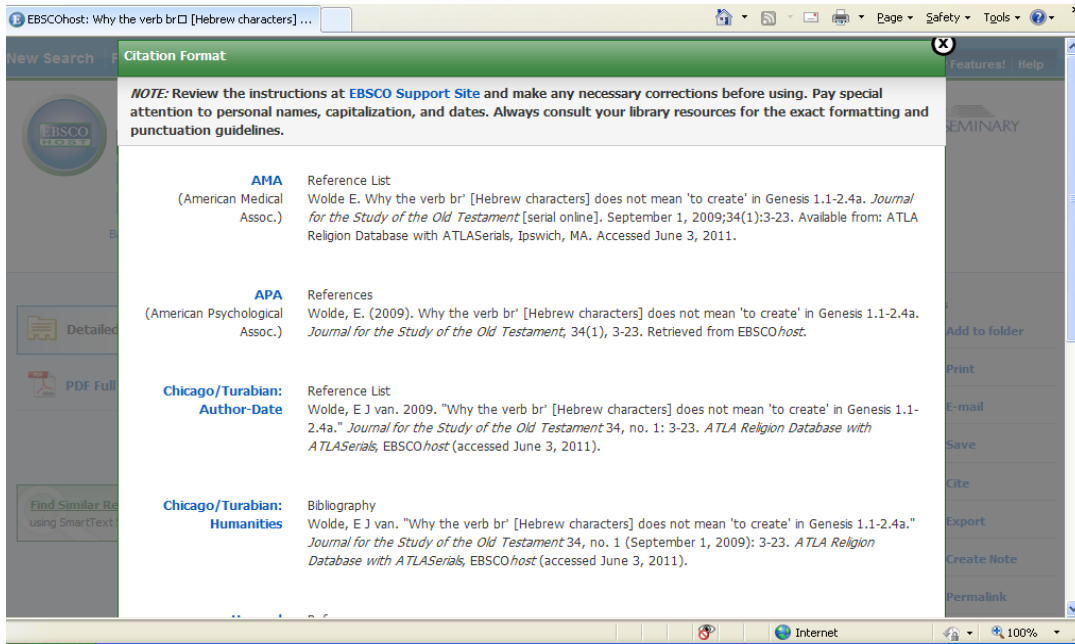

Printing Your ATLAReligion Search Results

1. Click on the Publication Title:
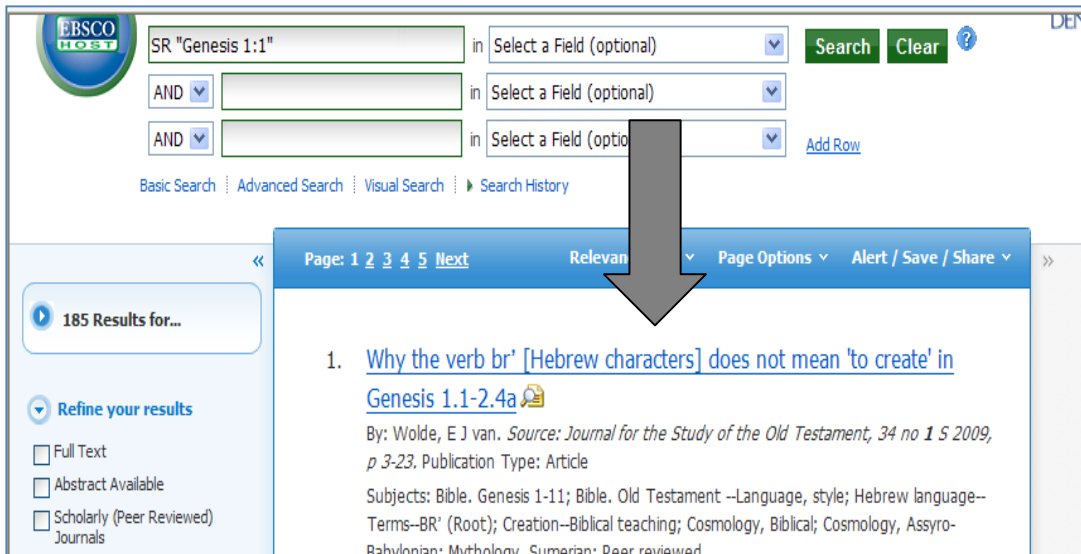

The following window will appear: Click on the printer icon in the Tools sidebar to print the detailed bibliographic record.

To print the record, click this printer icon

Limiting Searches

From the search results screen, it becomes apparent that ATLA can return thousands of items for any given search. Being able to limit the search in various ways is very helpful.

Limiting the search to Full Text Documents

Search results can be limited to return only documents that are available as PDF files or that are linked to full text documents. This can be done in two ways.

Method #1 – Limit search to Full Text in the Search screen

1. Enter the criteria for your search and click in the Full Text box in the "Limit your results" section. Then click the Search button to run the search.
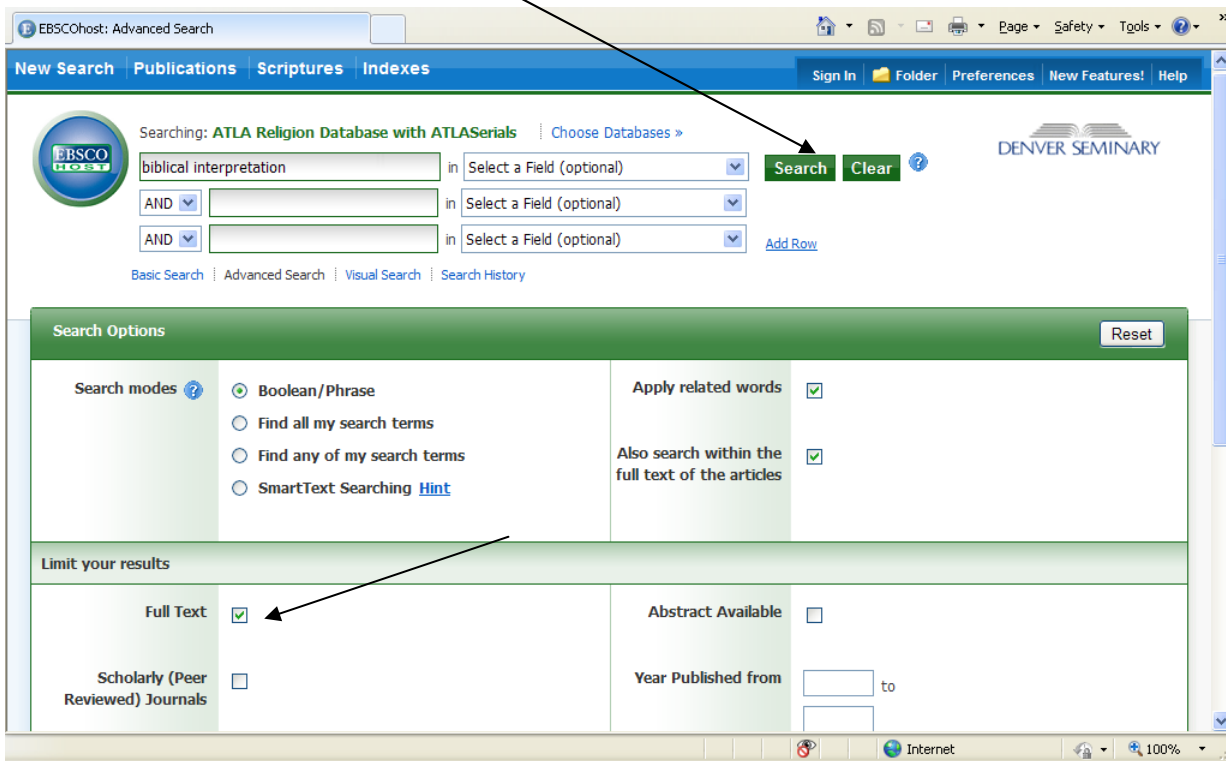

Method #2 – Limit search to Full Text in the Search Results Screen

Once a search has been run, it can still be limited to only Full Text documents. The Search Results Screen has a section called "Limit your results" to the right of the search results:

To limit the results to Full Text documents:

1. From the search results screen, click on the Full Text box in the Refine Your search side bar.
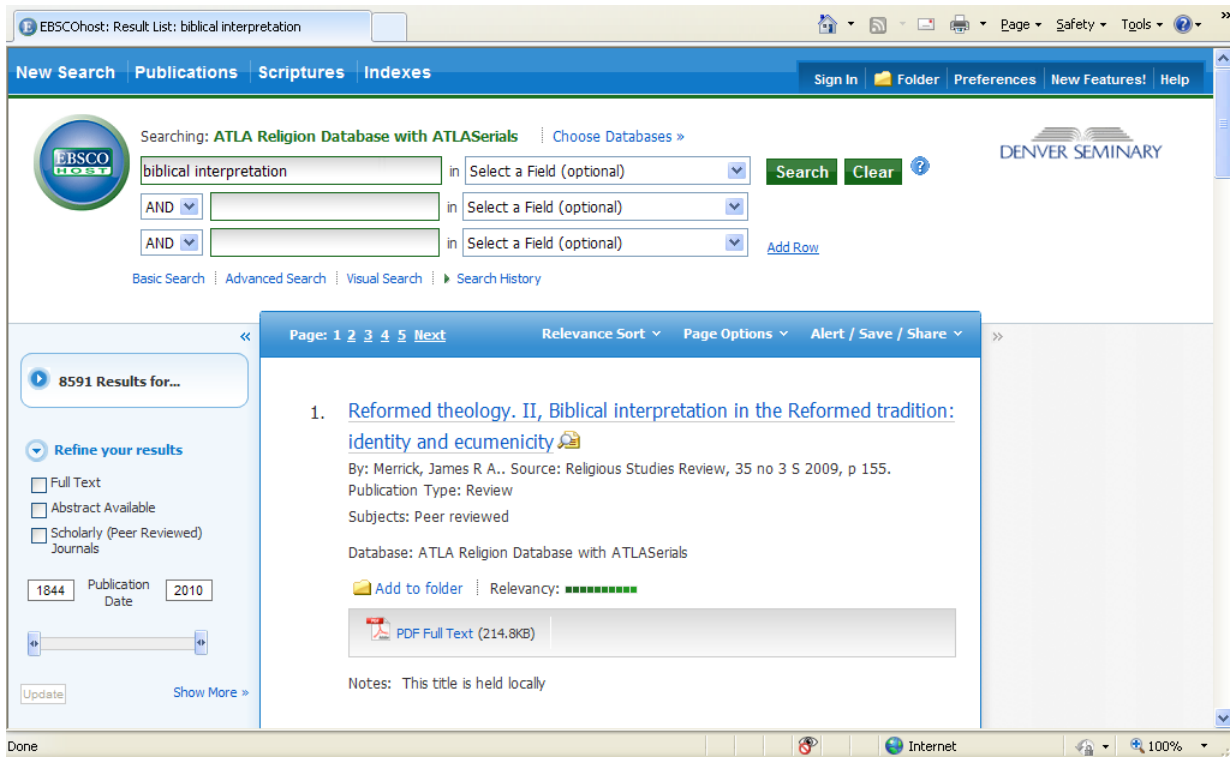

Click the Update Results Button to update the Search results

Limiting the search to Documents with Abstracts

Some documents do not come with abstracts that will give a synopsis of the article. ATLAReligion allows you to limit your searches to only those that do. There are two ways to do this.

Method #1 – Limit search to Documents with Abstracts in the Search screen

1. Enter your criteria for your search:
2. Click the Abstract Available box in the "Limit your results" section:
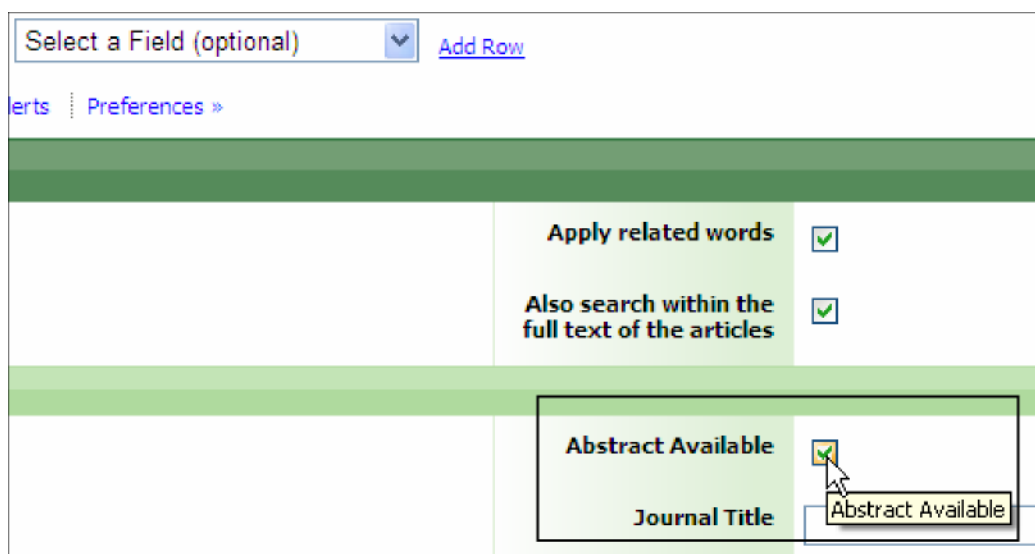

3. Click on the Search button to run the search.
Method #2 – Limit search to Documents with Abstracts in the Search Results Screen

Once a search has been run it can still be limited to only documents with abstracts. The Search Results Screen has a section called "Refine your results" to the left of the search results. Click in the Abstracts Available box.
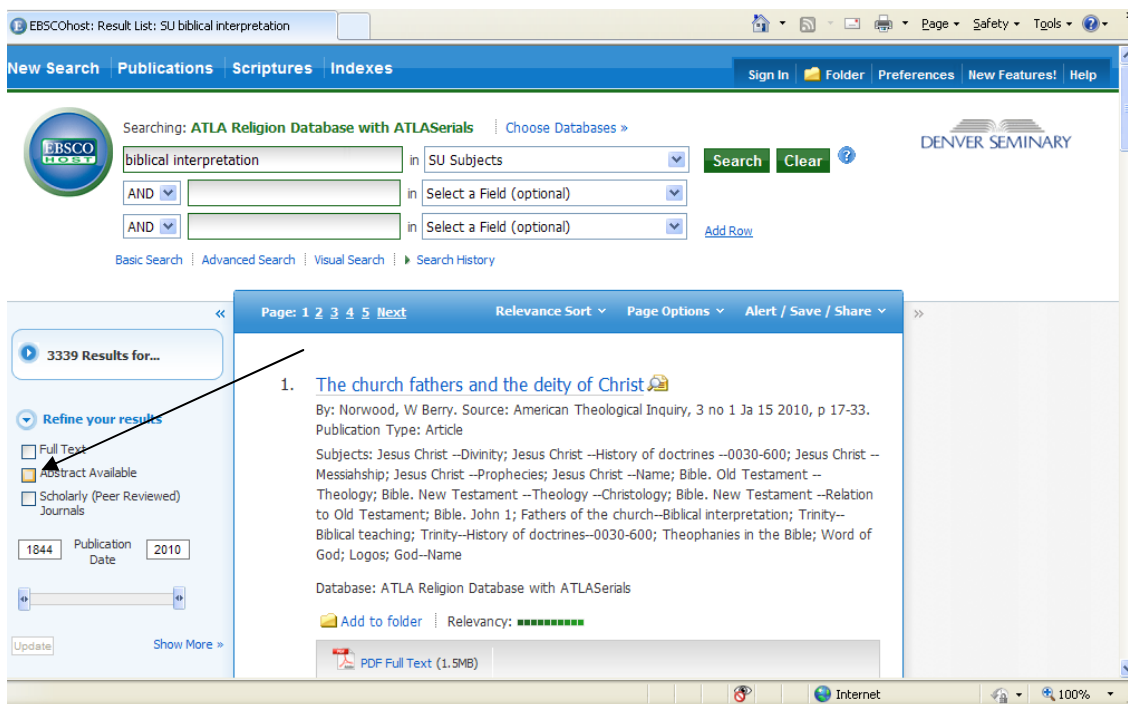

A popup box will appear. Click on the update button and the next screen will reflect the refined search results.
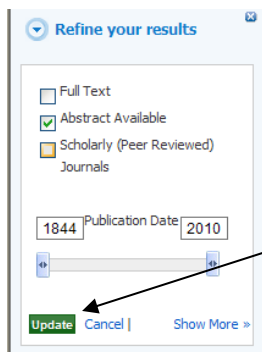

Limiting the search to a Range of Dates

You may have a need limit the search to a specific date or a specific range of dates.
ATLAReligion has two ways to do this.

Method #1 – Limit search to a Range of Dates in the Search Screen

. Enter your criteria for your search:

. Enter the beginning and ending dates in the "Year Published from" boxes in the
  "Limit your results" section. Then click on wither "Search" button to run your
  search.

Method #2 – Limit search to a range of dates in the Search Results Screen

Once a search has been run it can still be limited to a range of dates. The Search Results Screen has a section called "Refine your results" to the left of the search results:

To limit the results to range of dates:

1. Enter the beginning date in the left date box and the ending date in the date box on the right

Enter date limits here

Click Update to apply the date limits
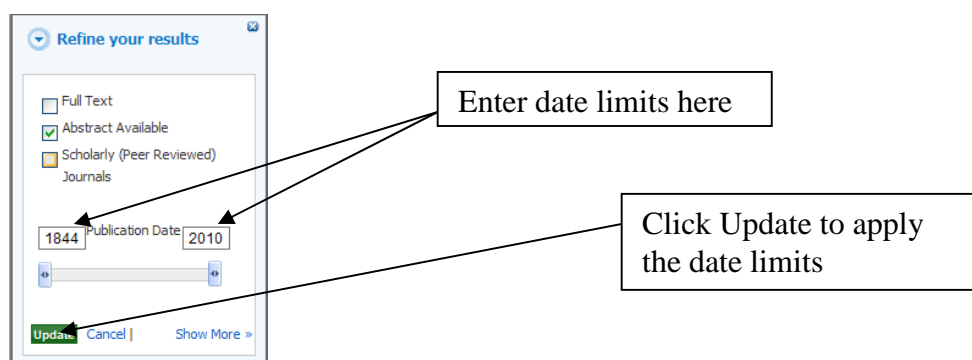

Limiting the search to a Specific Document Type

You may have a need limit the search to a specific document type, such as an article or essay. This type of search can be done from the main (or advanced) search screen. (If you are already in the search results screen, you can get refine the results by clicking on the Source Types option in the Refine your results section on the left sidebar.)
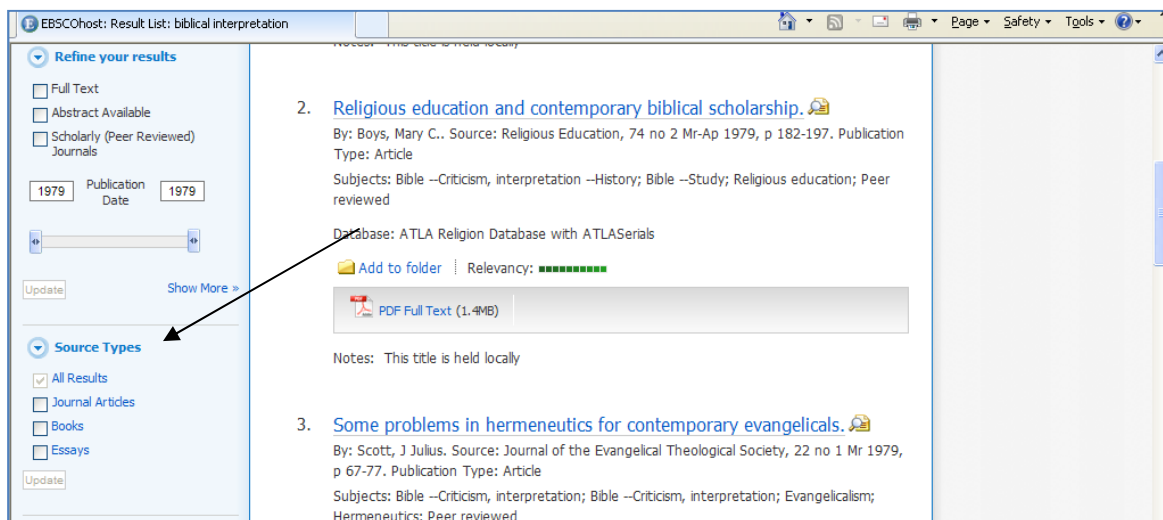

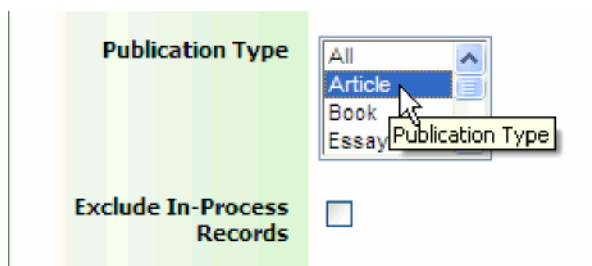

To limit your search to a specific document type from the main Search screen:

1. Make sure you are looking at the main (advanced) search screen.

2. Locate the "Publication Type" list in the right middle of the "Limit your results":
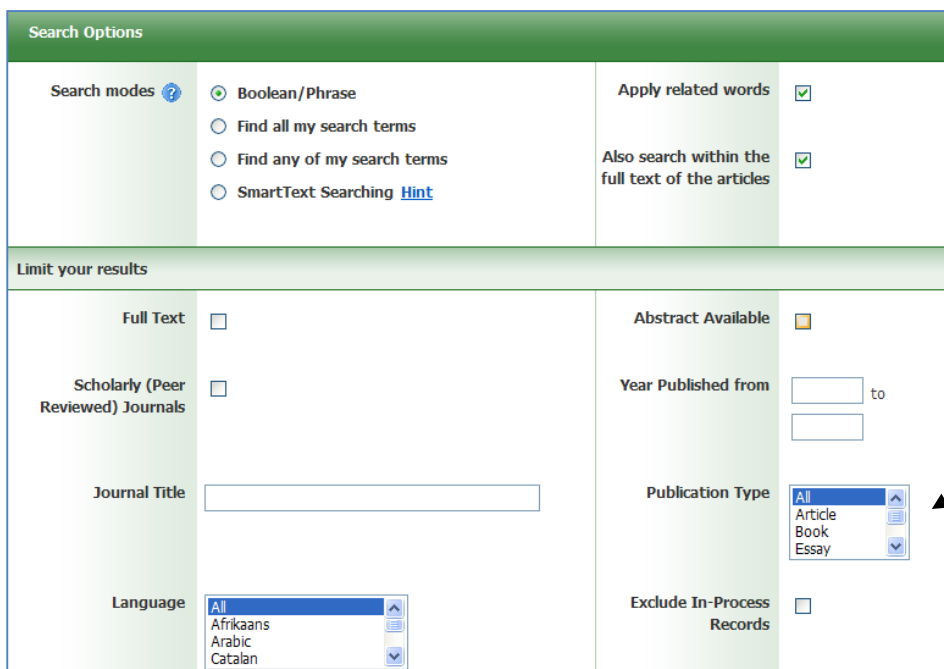

3. Select the type of publication (in this case article):

4. Click on Search button to run the search.

Limiting the search to a Specific Language

You may have a need limit the search to a specific language, such as Greek or Hebrew. This type of search can only be done from the main (or advanced) search screen. If you are already in the search results screen, you can get back to the main screen by clicking on the Advanced Search option underneath the criteria section:

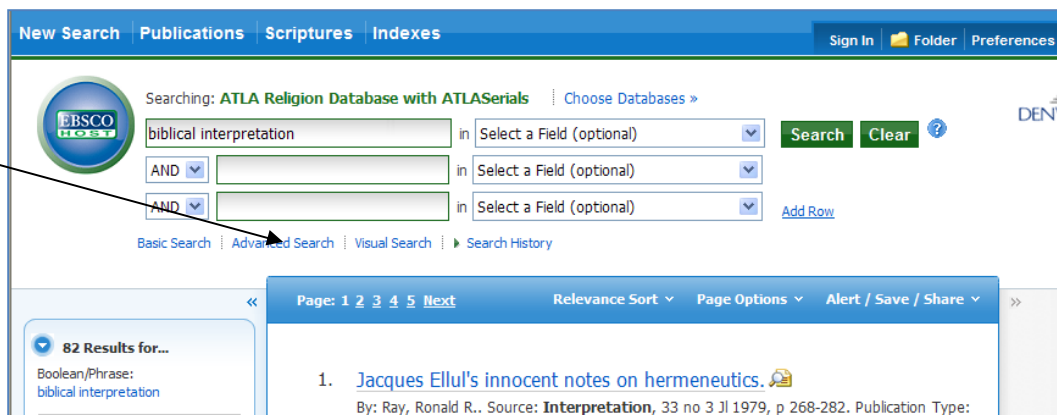

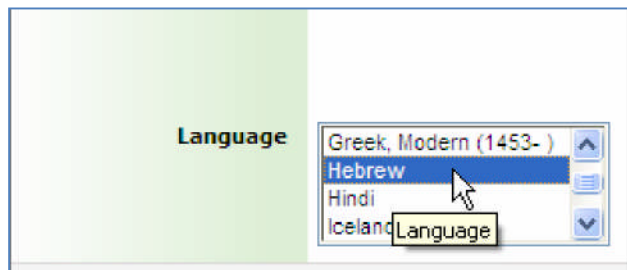

To limit your search to a specific Language:

1. Make sure you are looking at the main (advanced) search screen.

2. Locate the "Language" list in the lower left corner of "Limit your results":

3. Select the desired language from the list (Hebrew in this case):

4. Click on Search button to run the search.

Narrowing the Results of the Search

Sometimes you may need to narrow the scope of the results. ATLAReligion provides options for this in the left sidebar area – under Subject (expand if collapsed)

Simply click on a subject in the panel to narrow the scope of your search.
It is also possible to limit by specific publication (s) in the same manner.

Sorting the Results of the Search

By default the search results are sorted by relevance. They can also be sorted by author, source, or ascending/descending date. To change the way the results are sorted:

1. Click on the current Sort (in this case, Relevance) and click on the desired sort:

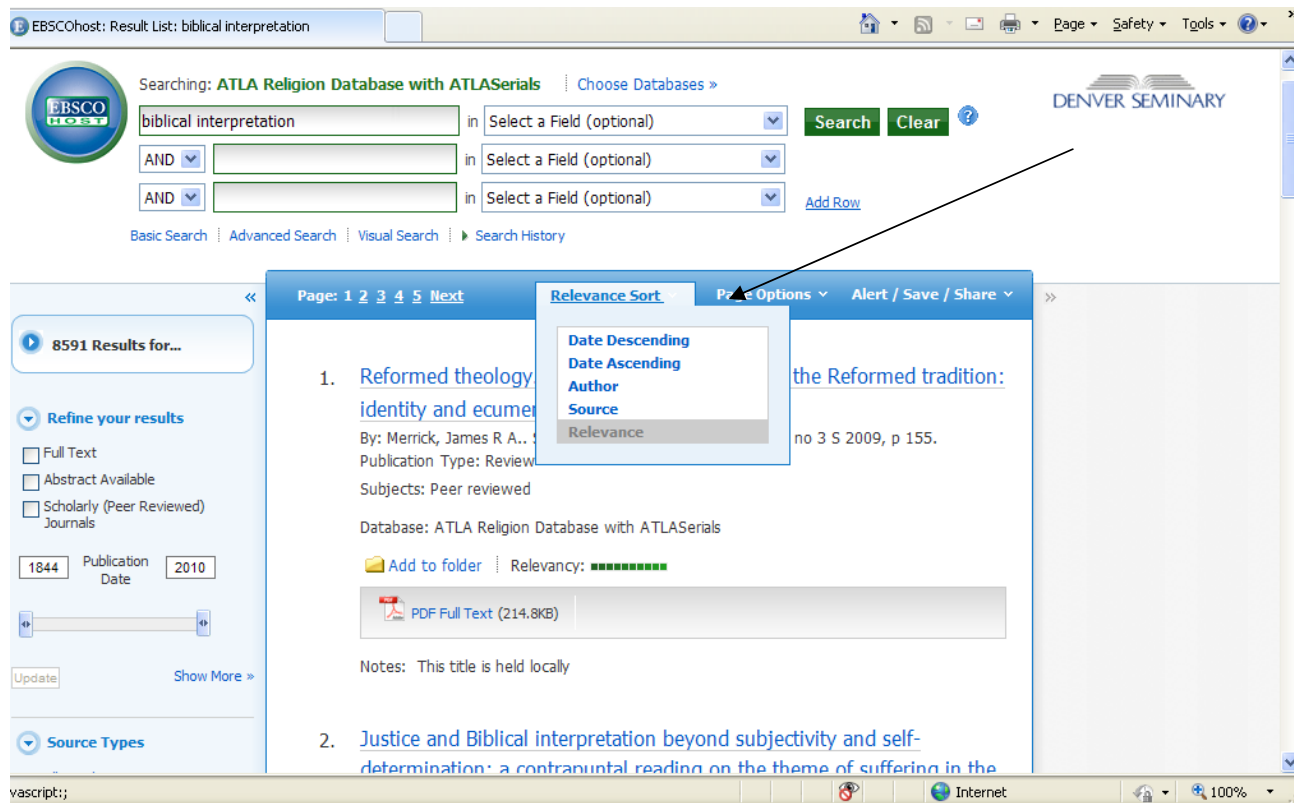

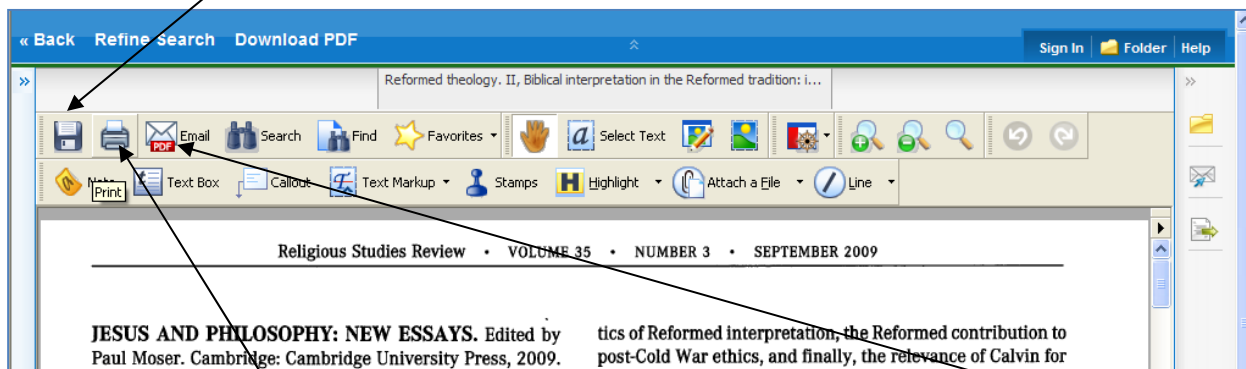

Printing/Saving/Emailing PDF files

Some publications come with a full text PDF file that you can save, email or print. To print, email or save the PDF file:

From the Search Results Screen:

1. Click on the PDF Full Text link:

2. Click on the Save icon in the PDF article to save the file after it opens:

3. Click on the Print icon in the PDF article to save the file or the email icon to email a PDF copy of the article.

From inside the Publication Information Screen:

1. Click on the publication title in the search results list to bring up the detailed record and click on the PDF icon in the left sidebar.
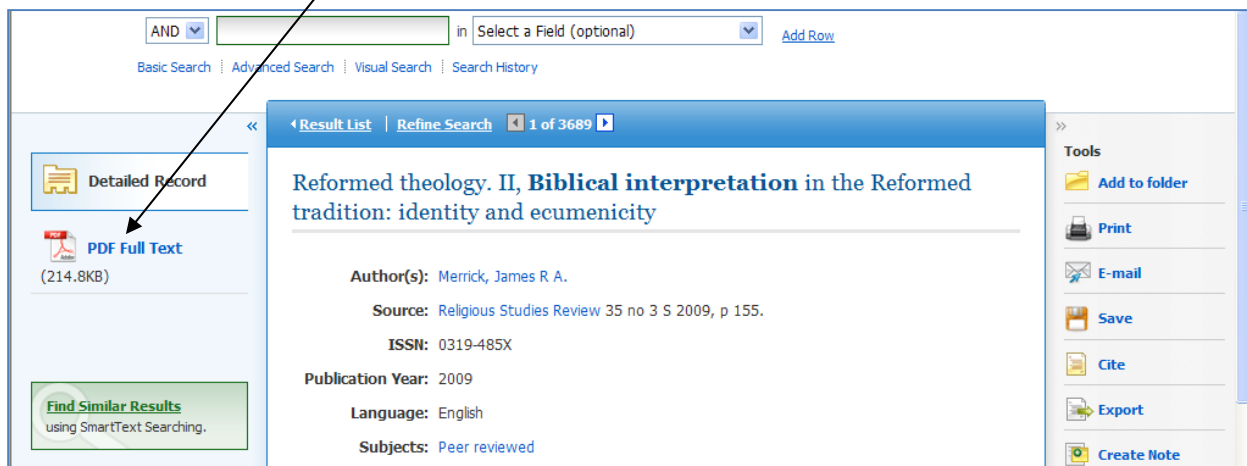

Follow steps 2 and/or 3 from above to print. email or save the PDF document once it is opened.
